*Things to consider
when choosing a table:*

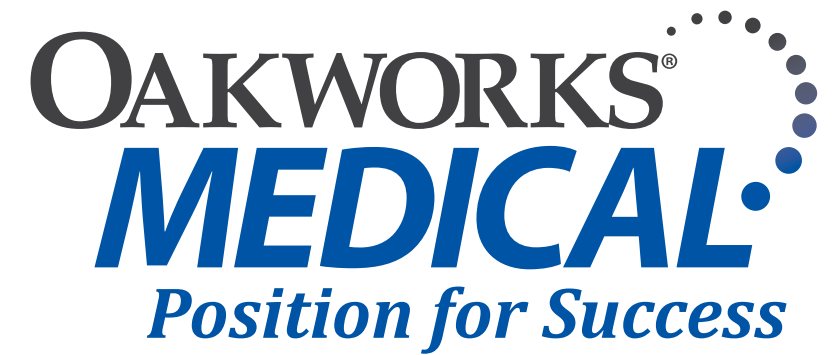

- What types of ultrasound procedures will be performed currently and in the future?
- What electric movements are a must for a new table?
- Will the table be moved around the room or mainly positioned in one spot?
- What accessories will be required?
- Are there any ergonomic issues to be addressed with the purchase of a new table?
- What is the budget?

Build-A-Bed

“Build-A-Bed” concept lets you customize Oakworks exam tables to the individual needs of each ultrasound suite. You only pay for the features you want & need. It’s an innovative way of ordering a truly custom built ultrasound exam table.

Start with any of our General Ultrasound tables, then simply add the features you want based on the type of ultrasound specialty you perform. Or you can order one of our Specialty tables that is preconfigured to meet your needs.

Build-A-Bed™ is Trademarked by Sound Ergonomics.
