

OAKWORKS SHIELD

Oakworks Shield is designed to reduce the risk of contamination via aerosols and droplets by providing a barrier between caregivers and patients. It is also effective in separating patients from one another in larger rooms.

Helps keep your staff and patients safe

Only \$295 Part # 82611

- 48" wide x 36" high barrier to aerosols and droplets
- Comes with enough film to make 25 barriers
- Optically clear film facilitates detailed work
- Stable design on wheels can be easily positioned or moved out of the way

BENEFITS

The Oakworks Shield allows appointments requiring caregivers to be close to patients to be executed more safely. The optically clear film can be easily positioned to create a barrier between two people while not restricting access to the patient.

Caregivers can get close enough to work while maintaining good ergonomics.

Visualization through the shield is excellent, as shown here.

Easy to reach under the shield or position body part outside of the shield.

This product is not FDA listed

FEATURES

Portable and easy to move, the Oakworks Shield can be rolled into place when needed; no need for expensive, permanent acrylic barriers that get in the way. Adjustable in height, you can easily find the balance between access and safety.

SHIELD SPECIFICATIONS	
Barrier Size	48" x 36" Shield Area
Height Range	8" - 38" (bottom of shield)
Base	5 Star with Wheels
Shield Support Arm	Carbon Fiber with 2 Clips
Support Pole	Stainless Steel 2 Piece Pole
Replacement Film Rolls	Roll makes 25 barriers, Part # 82664
Weight	11 lbs. without Roll, 22 lbs. with Roll
Warranty	1 Year

Oakworks Shield is designed to provide many months of crystal clear protection from a single roll. Instead of expensive permanent installations of clear acrylic or plexiglass that get cloudy over time from scratches and get in the way, the shield is very flexible to meet the needs of caregivers performing exams and procedures.

The shield can be used between patients to minimize exposure to aerosols and droplets. The shield is also easily moved when not needed.

- To create a new barrier, just cut off old barrier, pull out new film and clip in place
- Shield film and support elements can be disinfected allowing a single shield to be used for multiple days
- Additional Oakworks Shield Rolls are available for \$95
- Unit comes partially disassembled- assembles in a few minutes

The flexible shield creates an effective barrier to aerosols and droplets, even when proximity is a problem.

The shield's optically clear film is very flexible, tear and abrasion resistant. It can be disinfected and used over and over again, minimizing cost.
